

Community Schools

To Whom It May Concern,

I would recommend Tenurgy's services to any school district. Working with Tenurgy has been financially beneficial for Gull Lake Community Schools.

The District would not have achieved the utility savings we realized without the expertise and assistance of Tenurgy. Much of the savings has been a result of the quality contacts that Tenurgy has made on the district's behalf. Without their expertise in this area, the district would have missed out on the opportunity to realize significant energy savings.

Most impressive has been the continual monitoring of the utility bills and continued savings the District has realized. The fact that Tenurgy continually monitors our utility bills and looks for ways to enhance our savings has been remarkable.

In closing, our experience with Tenurgy has been excellent. They clearly have the knowledge and expertise in the utility markets that has made our partnership very successful.
