

To Whom It May Concern:

Lowry Solutions is the total solutions provider of enterprise mobility solutions. We work with our customers to reduce expenses and increase business efficiency through data collection and technology. I began to look at how we could improve our own business and decided to utilize one of the programs available to us through the Michigan Chamber of Commerce. We took advantage of the Utility and Telecommunications audit with Tenurgy.

The audit process was simple. We supplied them with just one month's worth of bills and a letter of authorization, and they were off and running. Tenurgy quickly identified several areas of savings including a gross overbilling on one of our out of state locations. Their knowledge was vast enough to help us secure a refund for some of the overcharges as well as to re-negotiate our contracts to reduce our cost by close to 50%.

Lowry Solutions is very satisfied with Tenurgy's audit services and would highly recommend the process to other businesses and chamber members.

Sincerely,
