John R. Watson
Tenurgy, LLC
445 E. Mitchell Street
Petoskey, Michigan 49770

Dear John,

We were first introduced to Tenurgy's utility auditing services at the Association of Steel Distributors Regional meeting. Shortly thereafter, we realized the benefits of auditing our utilities and engaged Tenurgy's services.

The auditing process was simple and time efficient. Tenurgy was able to verify the accuracy of utility billings and find several areas of significant savings. As a result of Tenurgy's experience and knowledge, they uncovered billing errors made by the vendor and mistakenly paid by us, identified refunds and presented annual savings. The billing errors equated to a significant refund and additional savings moving forward.

With today's economy it is imperative for businesses to uncover every opportunity for cost savings. It is true what you say that your goal is to help us increase our bottom line. Thank you for the services you provided to Metal Processing. I would recommend your services to other companies.

Best Regards,
