

# Tenurgize Your Profitability!

## With a Tenurgy audit you don't have to invest money to make money.

We examine your current utility bill applying the rules, regulations and tariffs of your utility providers to find savings and refunds. If our audit does not uncover the opportunity for savings, refunds or credits, you owe nothing. Here's a list of clients we've Tenurgized!

### Our Simple Process

During our initial introduction we learn more about your business and discuss how our auditing experience has helped similar companies. If the audit makes sense, we will move forward with a Consulting Service Agreement and Letter of Authorization. We also require one month of utility bills for the savings and refunds process to begin!

#### DISCOVERY

The Letter of Authorization is used to gather account information, review your billing history, and evaluate usage information.

#### ANALYSIS

Our team further evaluates your billing data, verifies the charges, and investigates each line item on your invoices.

#### REPORT

Once the analysis is complete, you are provided with a detailed report highlighting the savings and refund opportunities.

#### SAVINGS

Savings and refunds are in your hands - you are given a portfolio of options, implementation is at your discretion.

### Proven Success

#### Henry Ford College:

*"Along with over \$70,000 in telecom refunds, Tenurgy was able to find \$25,000 more in energy savings. Highly recommend their audit service for savings opportunities."*

#### Eastern Michigan University:

*"Eastern Michigan University began to realize savings on utilities quickly to the number of \$300,000 to \$350,000 annually. Tenurgy's audit produced a number of other areas which are projected to add an additional \$100,000 or more in annual savings."*

#### The Detroit Lions:

*"Tenurgy performed their audit in approximately six weeks and presented us with a report detailing the savings opportunities available to Ford Field. The recommendations Tenurgy made has us on track to receive over \$100,000 in annual electric savings and an estimated \$10,000 in natural gas savings. "*
