

To Whom It May Concern:

I would certainly recommend the services of Tenurgy to any company. We began working with Tenurgy in August of 2012 to audit and analyze our utility and telecommunication bills. This audit cost us no upfront fees, and we had nothing to lose because Tenurgy only gets paid if we realize savings.

After an in-depth analysis, Tenurgy found incorrect billing on our utility accounts which dated back over ten years. They worked with the utility company to get a refund for our district that totaled over \$40,000. Additionally, Tenurgy suggested going after interest since it was such a lengthy billing error. They also continue to monitor our accounts and make recommendations for future savings.

Michael and his staff have the knowledge to drill down into the details of your invoices and find any discrepancies. They also have the personal contacts and experience to correct any incorrect billing. Michael was able to contact the supervisors at our utility company and arrange to get our billing issue resolved.

We are very happy with our experience with Tenurgy, and I would highly recommend their services to any business looking to save on their utility expenses.

Sincerely,

Kurt Jeffries
